	Job Description

Qlik Developer/Analyst	
Job title	**Qlik Developer/Analyst**
Experience	2+ Years
Location	Mumbai
Work Mode	Onsite

Job Scope

- Design and develop QlikView/Qlik Sense dashboards and reports based on user requirements.
- Perform data extraction, transformation, and loading (ETL) from various data sources (SQL, Excel, APIs, etc.).
- Create and maintain complex data models within Qlik applications.
- Optimize dashboard performance and ensure data accuracy and consistency.
- Collaborate with business analysts and stakeholders to gather requirements and deliver insightful analytics solutions.
- Implement best practices in Qlik development, including reusable components and standardized templates.
- Conduct unit testing, peer reviews, and documentation of developed solutions.
- Troubleshoot issues related to Qlik applications and provide ongoing support.

Accountabilities

- Experience in QlikView and/or Qlik Sense development.
- Strong proficiency in scripting and data modeling in Qlik.
- Experience with data integration from various sources (SQL Server, Oracle, flat files, REST APIs, etc.).
- Solid understanding of BI and data warehousing concepts.
- Good problem-solving and analytical skills.
- Ability to communicate clearly with both technical and non-technical stakeholders.
- Experience with version control tools like Git is a plus.
- Familiarity with Qlik NPrinting, QMC, or Qlik Cloud is desirable.

- Good to have:
- Qlik certifications (e.g., Qlik Sense Data Architect, Qlik Sense Business Analyst) are a plus.
- Experience in Agile/Scrum environments.
- Exposure to other BI tools (Power BI, Tableau, etc.) is a plus but not required.

Qualifications and Experience

- Bachelor's degree in computer science, Information Technology, or related field.
- Minimum of 2 years of experience as a SQL developer with a focus on designing and implementing data processes.

Technical Skills Required
- Strong Python
- Experience with Flask; basic Django knowledge
- strong understanding of SQL
- Hands-on with AWS basics
- Working knowledge of Linux & Shell scripting
- REST API design and integration
- Experience in Power Automate & Power Apps (Preferred)
- Experience in SharePoint Development (Good to have)
- Excellent communication and problem-solving skills.

Training:
- One Month Extensive Training Bootcamp would be provided to acquire the skills.18 months' work commitment from the employee is expected.
